

Unleash the Full Potential of Your Security Infrastructure

X-Guardian

At the heart of the XSpouse ecosystem is a centralized control platform that uses web API integration for seamless oversight and connectivity across all security devices. X-Guardian is a powerful web-based platform that enhances situational awareness by consolidating data from various XSpouse input and output devices into a single interface. This unified approach enables organizations to monitor activities in real-time, respond swiftly to incidents, and streamline operations.

How X-Guardian Works

The X-Guardian platform operates on a secure AWS cloud server, utilizing advanced data integration and management capabilities to provide a comprehensive view of the security landscape. It connects with a variety of devices across the XSpouse ecosystem, enabling real-time monitoring and alerting functions. Users can customize roles and permissions for different personnel, ensuring that appropriate access is granted based on individual responsibilities. Moreover, X-Guardian supports features such as geofencing and interactive mapping, enhancing effectiveness and accurate response in an emergency event. Its user-friendly interface makes it easy to navigate, allowing organizations to react promptly to potential threats. With its robust capabilities, X-Guardian is essential for maintaining operational security and fostering a proactive safety culture.

Key Features:

-  **Centralized Control:** Manage and monitor all XSpouse security devices from a single interface for streamlined operations and oversight.
-  **Real-Time Monitoring and Alerts:** Continuously analyze data and send instant notifications to designated personnel, enabling quick responses to security incidents.
-  **Customizable Roles and Permissions:** Define user access levels based on roles to secure sensitive information and ensure authorized access.
-  **Geofencing and Interactive Mapping:** Mapping provides real time device locations and status as well as access to command and control including video and audio.
-  **Open API Integration:** Seamlessly connect with third-party systems for enhanced functionality and expanded security capabilities.
-  **Powerful Reporting Tools:** Generate detailed reports on system performance and incidents to aid in planning.
-  **Real-Time device health monitoring:** Instant notifications when devices are compromised or go offline. Notifications can be customized using phone, text, or email to send to various groups within the organization.
-  **Custom Event Creation:** Simple point and click interface allows the creation of custom triggers and actions Using XSpouse devices.
-  **One-to-Many device management:** Push changes or updates to individual or groups of devices in real time with the click of a button.
-  **Mobile IOS & Android App:** Provides real time access to features such as Event activation, live status reporting, Geo-location, Chat Groups, Event Logs, Live Audio communication, Live Video communication, and more.

X-Guardian Features

Customer Portal Features	
Customized dashboard	Remote identification
System user management	Remote reboot
Roles and permissions	Remote reconfigurations
Mobile profile management	Controller management
Document library viewing	Live real-time controller log viewing
Event management using triggers and actions	Schedule management including one time and recurring visual and audible playlist management
Recurring event scheduling	Sound management including TTS support
One-time event scheduling	Contact management
Advanced visual event creation	Contact grouping
Device management	Contact importation
Over the air update capabilities	Billing and license viewing
Remote device configurations	Real time viewing logs and history
Device grouping	

Dealer Portal Features
Customized dashboard
Customer management and impersonation
Roles and permissions
Device management
Device health monitoring
Assign and unassign devices
Real time order processing and fulfillment
Billing management
License management
Maintenance management
Add-on management
Voucher creation and control
Document library
Real time event logs and history
24x7 Real time support via chat email and phone

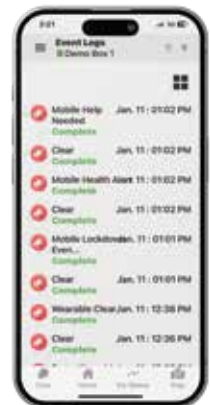

eMapping	
Live interactive maps	Device icon mapping
Interactive floor plan	Visual real time device status
Support for multiple floors	Location services
Custom layers	Multiple location management
3D mapping	Video and audio control via map

X-Guardian Software Levels		
X-Guardian Enterprise	ENT-SUITE	Enterprise Software Suite - Unlimited Devices
X-Guardian Professional	PRO-SUITE	Professional Software Suite - 75 devices
X-Guardian Essential	ESS-SUITE	Essential Software Suite - 15 devices

Choose from 1, 3, or 5-year Software Maintenance Agreements for all software levels, ensuring continuous support and updates.

X-Guardian Mobile		
X-Guardian Mobile Software - 1-Year	38-MS1	Guardian Mobile Software License
X-Guardian Mobile Software - 3-Year	38-MS3	Guardian Mobile Software License
X-Guardian Mobile Software - 5-Year	38-MS5	Guardian Mobile Software License

X-Guardian Controller		
X-Guardian Controller - Rack	38-000	Rack Mounted Controller preloaded w/ Guardian Software
X-Guardian Controller - Standalone	38-0002	Standalone Controller preloaded w/ Guardian Software
X-Guardian Controller - Virtual Machine	38-VM	Virtual Controller software for VM environment preloaded w/ Guardian Software
